Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sumners (U.S. Patent 2,917,283).

Sumners discloses a method of slowing a vehicle comprising providing a panel (13) and deploying it above a surface (Figure 4, for example). Only one panel is shown; however, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have positioned two or more panels as claimed to suit a particular application. Note that even if spaced many miles apart along the same surface, claim limitations would be met.

Claims 16 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nasatka (U.S. Patent 4,893,119).

Nasatka discloses a method of slowing a vehicle comprising providing a panel (14) and deploying it above a surface (abstract, for example). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have positioned two or more panels as claimed to suit a particular application. Note that even if spaced many miles apart along the same surface, claim limitations would be met.

Art Unit: 3671

Claims 16, 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thompson (U.S. Patent 5,419,537).

Thompson discloses a method comprising providing a panel (14, 16, 60) and deploying it above a surface (Figure 2, for example). Vehicles would inherently slow to cross this structure, since failure to do so would likely result in damage to the structure and/or the vehicle. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have positioned two or more panels as claimed to suit a particular application. Note that even if spaced many miles apart along the same surface, claim limitations would be met.

Allowable Subject Matter

Claims 24-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed February 7, 2005 have been fully considered but they are not persuasive. As discussed in the rejections above, positioning identical structures of any of the prior art devices linearly along a surface meets claim recitations, even if one of the structures is not activated. Because duplicating known parts is not patentable subject matter, the rejections stand.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
